Adapting the general rules on investment

It is a matter of increasingly social concern to sustainably manage investments. SUI SA is also intending to submit to this. This is why the Board of Directors decided to adapt rules on investment of SUI SA by adding the criterion “sustainability”. Apart from the main objectives of the investments, i.e. security and liquidity, the criterion of “sustainability” shall now also be anchored into the general investment rules.

Pursuant to the Articles of Association, the General Meeting is responsible for the general investment policy with regards to the collected remuneration (Article 9.2.2 m).

The Board of Directors therefore proposes that the general rules on investment should be supplemented by the criterion of sustainability.
